¿QUE ES UN HACKER?

Que es un hacker

- Según el jargon file es: "alguien que le gustan los retos y es creativo "

<http://www.jargon.net/jargonfile/h/hacker.html>

1975 Jargon file

Sexual Habits
Appendix B. A Portrait of J. Random Hacker

Hackerdom easily tolerates a much wider range of sexual and lifestyle variation than the mainstream culture. It includes a relatively large gay and bisexual contingent. Hackers are somewhat more likely to live in polygynous or polyandrous relationships, practice open marriage, or live in communes or group houses. In this, as in general appearance, hackerdom semi-consciously maintains 'counterculture' values.

larval stage L

larval stage: n.

Describes a period of monomaniacal concentration on coding apparently passed through by all fledgling hackers. Common symptoms include the perpetration of more than one 36-hour [hacking run](#) in a given week; neglect of all other activities including usual basics like food, sleep, and personal hygiene; and a chronic case of advanced bleary-eye. Can last from 6 months to 2 years, the apparent median being around 18 months. A few so afflicted never resume a more 'normal' life, but the ordeal seems to be necessary to produce really wizardly (as opposed to merely competent) programmers. See also [wannabee](#). A less protracted and intense version of larval stage (typically lasting about a month) may recur when one is learning a new [QS](#) or programming language.

Donde encontrar un hacker

Volunteer

Here are the six different things that you can help us out with:

1. Plunder other hidden service lists for links and place them here!
2. File the [SnapBBSIndex](#) links wherever they go
3. Set external links to HTTPS where available, good certificate, and same content.
4. Care to start recording onionland's history? Check out [Onionland's Museum](#).
5. Perform Dead Services Duties
6. Remove CP shitness.

"The code doesn't obey the system"

=====

The Mosquito or Mosquito alarm (marketed as the Beethoven in France and the Swiss-Mosquito in Switzerland) is an electronic device, used for solving loitering problems, which emits a sound with a high frequency.

The newest version of the device, launched late in 2008, has two frequency settings, one of approximately 17.4 kHz that can generally be heard only by young people, and another at 8 kHz that can be heard by most people.

The maximum potential output sound pressure level is stated by the manufacturer to be 108 decibels (dB). The sound can typically only be heard by people below 25 years of age, as the ability to hear high frequencies deteriorates in humans with age (a phenomenon known as presbycusis).

The device is marketed as a safety and security tool for preventing youths from congregating in specific areas. As such, it is promoted to reduce anti-social behaviour such as loitering, graffiti, vandalism, drug use, drug distribution, and violence. In the UK, over 3,000 have been sold, mainly for use outside shops and near transport hubs.

The device is also sold in Australia, France, Denmark, Italy, Germany, Switzerland, Canada and the USA.

=====

Intro:

Update Report a Bug

A screenshot of a computer interface titled "XSSer". The main window displays a large orange graphic of a biohazard symbol. Below the graphic is a terminal window showing a multi-line ASCII art representation of a face, identified as "The Hive!". The terminal window also contains text about the Mosquito device, its marketing, and its effects on hearing. At the bottom of the screen, there are standard operating system navigation buttons for "Update" and "Report a Bug".
